THINK GREEN®

You Decide Where it Ends Up

One third of garbage sent to the landfill is food waste, yard waste and food-soiled paper! Combining food scraps and food-soiled paper with your yard waste will reduce your garbage and turn your yard trimmings and leftover food scraps and food-soiled paper into beneficial garden compost.

Collecting food scraps in your yard waste cart is nearly as easy as throwing them away as garbage, here's how:

- 1 Find the kitchen collection method that works for you:

A stylish compost pail placed on the counter.

A reusable kitchen container, such as an old pitcher lined with a paper towel.
(Hint: Store in refrigerator to minimize odors until ready to take out)

A paper bag or an approved compostable bag.
(visit recyclefood.com for a list of compostable bag retailers in your community)

Alternatively, wrap food scraps in newspaper and store in freezer until ready to take out to your yard waste cart.

- 2 At your convenience, empty collected food scraps into your yard waste cart. Your yard waste cart will get emptied on your regularly scheduled collection day. (Hint: Bury food under yard waste to minimize pests or odors)
